## EXPERIENCE

### Full Stack Developer (Internship) | EventsBridge

May 2025 - Present

- **Led a team of 5 web developers** in integrating code contributions, resolving merge conflicts, and ensuring seamless collaboration across main and production repositories.
- **Reduced server load and improved system efficiency** by integrating caching strategies and optimizing database queries.
- Designed and developed a complete **Admin Booking Dashboard** using React Query, featuring categorized event listings, real-time updates, highlighted new bookings, sorting capabilities, and **booking approval workflows**.
- Implemented secure **OTP-based admin authentication** for controlled user signup approvals and sensitive operations.
- Improved Core Web Vitals by reducing **LCP by 37%, FCP by 43%, and CLS by 68%** across mobile and desktop.
- **Achieved a 30% increase in mobile traffic and a 20% reduction in bounce rates** after implementing responsive design principles.
- **Implemented secure backend APIs and services**, handling critical financial data such as bank account and UPI details with robust authentication.
- **Boosted user engagement by 30%** through collaboration with the product team in designing and delivering new features.
