

PROFESSIONAL SUMMARY

Product-driven Full Stack Developer having 1 year experienced in building and scaling web applications end-to-end. Passionate about solving real user problems and creating impactful, scalable products.

SKILLS

- **Frontend:** React.js, Next.js, Tailwind CSS
 - **Backend** | Node.js, Express.js, REST API Development
 - **Databases** | MongoDB, MySQL, Redis
 - **DevOps:** Docker, AWS, WebSockets, GitHub
- **AI Integration:** LLM APIs, Prompt Engineering
 - **Languages:** JavaScript, Python
 - **Soft Skills** | Communication, Problem Solving, Team Collaboration

PROFESSIONAL EXPERIENCE

Full Stack Developer | EventsBridge
Odisha, India

April 2025 - Present

- Designed and optimized backend APIs and database queries, improving system performance (**LCP ↓37%, FCP ↓43%, CLS ↓68%**).
- Backend development and system **code integration** across multiple modules, ensuring production stability and seamless deployments.
- Implemented caching strategies using **Redis** and **React Query**, optimizing database access patterns and client-side data fetching to significantly reduce response times and enhance overall system scalability.
- Developed secure backend systems with OTP-based authentication and financial APIs, ensuring reliable transactions.
- Engineered real-time admin dashboard workflows with optimized API state management, improving data synchronization efficiency.
- Improved system usability and performance, increasing mobile traffic by 30% and reducing bounce rate by 20%.

PROJECTS

GitHub: (550+ commits, active contributor)

AI Interview Taker – AI-Powered Interview Practice Platform | [GitHub](#)
Tech: Node.js, Express.js, MongoDB, Gemini AI, JWT

- Built and deployed an AI-powered interview platform on Render, enabling real-time interview simulation and personalized feedback using LLM workflows.
- Developed **API orchestration layer** to handle multi-step AI workflows (question generation → response analysis → feedback).
- Implemented **AI-driven response evaluation system** for performance tracking and weak-area detection.
- Built secure authentication and session management using JWT.

InstaCrm– CRM System | [GitHub](#)

- **Lead Management:** Built scalable CRM system handling lead tracking and automation, improving sales workflow efficiency and reducing manual effort.
- **Operational Efficiency:** Developed a custom **Template Engine** for rapid outreach and a **Bulk Import** system, significantly reducing manual data entry for high-volume users.

CERTIFICATION & ACHIEVEMENTS

- **Built and deployed AI-powered applications using Google AI Studio** with training in prompt engineering, AI application design, and cloud-based deployment workflows.
- **Udemy Certified React Developer** - Built three real-world React applications focusing on modern React development and responsive UI design.
- **Full Stack Web Development – Apna College:** Developed full stack web applications using MongoDB, Express.js, React.js, and Node.js.
- **GATE 2025 – Qualified:** Demonstrated strong knowledge of computer science fundamentals and problem-solving.

POSITION OF RESPONSIBILITY

Google developer groups | Core Member (DSA/CP) - Collaborated on community events and organized workshops to promote tech awareness at BN College Of Engineering And Technology.

EDUCATION

- **B.Tech in Computer Science**
BN College of Engineering and Technology, Lucknow
- **Senior Secondary (12th), ICSE – 2020**
St. Antony's Inter College, Lucknow

(2021 - 2025)
Percentage : 73.21%(CGPA: 7.82)

Percentage: 83.25%
